The station consists of two side platforms and a set of two tracks. History The construction of the railway in the city of Zadar was started in 1849, but was halted because of the outbreak of the First Slavic War. The next year it was restarted in the place of the existing station and expanded to two tracks. The railway line reached Zadar in 1859. The terminal in Zadar has changed several times: the first was the Prva mašalata (1874), the second was the Gvozinski vagon (1896), and the third was the Zadarski vagon (1927). The current depot of the railway is situated in the southern part of the station. During World War II, the station was damaged by several bombs. In 1951 the station building was reconstructed. In addition, new connections to the Dalmatian coast were built. The most notable of these was the Zadar–Šibenik line, which, together with the Zagreb–Šibenik railway, makes up the railway corridor of the Pan-European corridor V. On 26 September 1980 the railway line was electrified. In the mid-1990s, the Croatian Railways expanded the Zadar railway station by building two platforms (on the south side of the station). In 2004, the Ministry of Transport and Maritime Affairs carried out extensive renovation work, which included the reconstruction of the Zadar railway station. Traffic The most important regional trains that stop at Zadar are the following: Zadar–Zagreb Zadar–Šibenik Zadar–Split Zadar–Vodice Zadar–Sinj Zadar–Istria References External links Category:Railway
