History The first version of Music Maker was released in 1995. It was named Melody Maker in the UK and was a strictly audio recording program, designed to work well as a supplement to music notation software. Melody Maker was developed by the software company Brainware Ltd. The first version was only available on the Mac OS platform. Music Maker was brought to the new Windows platform in 1996 as part of Music Maker 2000. Although slightly expanded in its feature set, the changes were very basic and it remained a strictly audio recording program. This 3da54e8ca3
