OST stands for Open eXtended Storage, and is a proprietary format used to store all the emails, contacts, calendar and tasks created in Microsoft Outlook. It can be hard to find an app that can properly read, format and convert OST files into other compatible formats. FileRip is the best OST to MBOX Converter. Unlike other OST to MBOX conversion software, FileRip is the only app that does away with the need for the email itself. Instead of converting the whole OST file, this app instead creates a folder that holds all the emails, contacts, calendar and tasks. Files are then moved one by one to a folder of your choice and can be transferred to your Google Drive account and other MBOX supporting apps instantly. Looking for some other OST to MBOX Converter software? You are going to love FileRip!
