Description proNestor Visitor Management installs an easy-to-use visitor registration system for use throughout the building, enabling employees, receptionists, security personnel, and facility managers to easily register visitors - print out personalized Badges, and keep a constant overview of all visitors throughout the building in one, easy-to-use system. No longer is it necessary to remember each and every person who comes into your facility, you can simply tag them with a visitor badge, and set the parameters for their visit. The visitor registration system will capture visitors' name, contact information, reason for visit, date and time visit begins and ends. The visitor Badge will consist of your company logo and visitor Badges will be displayed on the visitor's person along with the badge. You can also customize the visitor Badge colors, text, and backgrounds. With proNestor Visitor Management installed within your facility, you can create individual schedules for each visitor group, your employees, security and facility manager, to view daily, weekly, monthly or yearly reports for each visitor. Each individual can be assigned to a specific department within the building, so you know where to go if something is needed of that department. proNestor Visitor Management can be installed on Windows 2000/2003/XP/Vista, MacOSX, and UNIX based environments. The Windows version for proNestor Visitor Management is fully integrated into Microsoft Windows, so that proNestor Visitor Management can be fully functional within your Windows environment. In addition,

proNestor Visitor Management is fully compatible with popular Enterprise Identity Management Suite/Platforms. proNestor Visitor Management can be integrated with Lotus Notes, Domino, Exchange, Yahoo!, Internet Explorer, Internet Information Services, Sybase, and Microsoft SQL Server. The proNestor Visitor Management API can be used with Sun ONE DBExpress. License proNestor Visitor Management can be licensed for single-user installation, or for a fully networked installation. A fully networked installation can be used by multiple users for building security, receptionists, and facilities to use for visitor registration within their various departments. Installation proNestor Visitor Management installation includes the proNestor Visitor Management Database, proNestor Visitor Management API, and a set of easy-to-use installer utilities. proNestor Visitor
