If you remove Primo.BIN then the internal databases are corrupted and you cannot load maps or save data. A: The maps are stored in the Primo.BIN file. You can remove this and load again. Other files such as maps, datas (wms, esri, kml...) are stored in the root directory. But any dataset file is also found in the root directory. Download and install Primo Download Primo_2.1_4.zip Extract and install it You will find a file called Primo_2.1_4.ini in the root directory. Open it with any editor (gedit) and remove the lines in it which gives the path to the maps (Primo.BIN file) Save and close the file. Done. Donate An Israeli factory involved in the production of Gaza-bound goods pledged to stop ties with Israel on Sunday after a UN investigation found it supplied some 3,500 tons of cement for the construction of an Israeli security barrier in the occupied West Bank. The Israeli cement factory, Ormat, pledged on Sunday to cease cooperation with Israeli companies that were found to be supplying goods to the Israeli security barrier and vowed to boycott the international community. "Ormat will no longer be party to the transfer of cement to the Israeli company responsible for the security fence. This applies to all cement
