Rain of Reflections: Set Free is a modern retelling of the X-COM series, with a turn-based tactical combat system, 3D first person environments, and a planned campaign which can be played offline and on a variety of difficulty settings and against a variety of opposition. Players will step into the boots of the last surviving member of a special unit called “The Last Regiment” and experience the dangerous mission of the Unit’s leader; Seth Haley. Seth Haley is a soldier who’s been trained to survive in the most extreme conditions, and during the upcoming events of the game, he will be deployed out into the field to find out what’s happening and if any of his comrades survived. Details: Rain of Reflections: Set Free is a turn-based tactical combat game with open world environments. Players will take control of a team of four operatives (that can be expanded up to six for each side) and develop a strategy for them to survive against a wide variety of opposition. There are three approaches to the game, Creative, Arcade, and Survival. Rain of Reflections: Set Free is divided into separate missions, each with a wide range of objectives and challenges that include exploration, combat, and puzzle-solving. Missions are divided into three categories; melee, ranged, and special. Each of the team members can specialize in melee or ranged attacks. Players can equip different pieces of gear from items dropped during missions or purchased in the overworld. Items, including grenades, can be taken along on the overworld with the player, unlocked by completing different objectives. Details: Rain of Reflections: Set Free includes a planned campaign which has fourteen missions with over forty hours of gameplay. Players have the option to play the campaign in single player mode or in multiplayer co-operative mode. In single player mode, the game has four difficulty settings which will affect the frequency of different events, as well as their penalties. Multiplayer will be divided into head-to-head battles for small teams or bigger teams

"Neon Chrome" is a point and click / bitmap adventure game, set in a world where cyberpunk style technology has transformed the surface of Earth into an advanced humanoid society, where danger has finally reached it's peak, and where the only thing left for humanity is to be placed in a vast prison complex known as 'Chrome City'. In this city, the lower classes live in slavery and the upper classes live a life of luxurious leisure, on the ultimate high-tech pleasure planet, much to the chagrin

of the 'Elite' hackers who work for the protection of the human race. When a criminal by the name of 'Neon Chrome' breaks the security of Chrome City and gains access to all of its systems, the entire cyber-age world is plunged into chaos. Neon Chrome, who is actually a woman, has the ability to hack and control all the city's high-tech implants, and it is up to you, as a Hacker Elite, to stop her from doing so. What's new:

Banana Town was a type of underworld slang for the Prohibition-era neighbourhood of New Orleans, particularly the 3rd and 4th Wards, and the adjacent French Quarter. A name from the Anthony Comstock's 1873 novel The Prostitute, Banana Town consisted of hidden speakeasies, bathhouses (some had outdoor ports of entry), alcohol-distribution network and other illicit enterprises. Accounts of the origins of Banana Town are plentiful and range from the 18th century to 1900.

Origin of name The term was applied to a district in the quarter because of the many coconut sellers outside St. Louis Cathedral. Within the district, taverns selling illegal alcohol boomed alongside a strong oriental population, unlike elsewhere in the city. Within these establishments were places of amusement and narcotics-distribution, as word of this activity spread throughout the city. Banana town could refer to the entire district or a subset of establishments within it.

Corruption in New Orleans Slang originated in several areas in the United States, including New Orleans. As the old 13th Ward began to move from the area along Orange Street near New Orleans' Inner Harbor, ending residents' access to lake water, they desired less frequent access to the large and unaccountable ships. They demanded the establishment of regulation docks. Hoping to gain control, these docks were built on lots surrounding the Mother Canal. Many of these lots contained dwellings and waterfront residential streets, which were typically vacant. These remained vacant until 1916, when another group of residents sought control of the lots. In total, thirteen waterfront lots, in size, were now controlled by residents who wanted to use these lots for the purpose they were originally built for. The city government began to request that some of the lots be torn down. The 13th Ward Redevelopment Committee tried to prevent the demolition, but they had little power, and with the votes of the 13th ward, the city had little reason not to delete these lots. Until this point, only the relocated Mayoral Nuns' Island was close to the major roadway. With the eviction of the 13th Ward, these lots became the Truck Yard, which led to the 13th Ward becoming more associated with organized crime. In their book about the truck

yards, Carmen Veloz and Moises Rodriguez mention that this district became unsafe for tourists. These same two book authors wrote that the Baratarians, who ran this district, threatened a Vice Squad member. Fearful
