How to Install Freeplane BrainStorming Software for MAC & PC For Freeplane BrainStorming Software

1.Open "Autodata" folder from "program files" folder 2.Double-click "autodata.exe" 3.Run the program by double clicking "autodata" file 4.Click on "New Project" button 5.Give your project a name 6.Click "OK" to save and exit Click the "open menu" menu (middle of the screen) and click "Other". On the "Browse" screen, find and select the "PHP 5.6" option Next, click the "download" button below the "PHP 5.6.32" folder Save the file in the same folder as the "php.ini" file. (Most likely, that is the "c:\xampp\php\php.ini" folder) Right-click the "php.ini" file, and then click "properties" Click the "open" button (this will open a window to edit the file in "Notepad") Locate the line that says "extension=php_dompdf.dll" and remove the quotation marks (remove the "" characters on either side of the quotation marks) Click the "save" button in the top right corner of "Notepad" Right-click the "php.ini" file and click "rename" Now right-click the newly renamed file and click "open" Confirm the file you chose is called "php.ini", not "c:\xampp\php\php.ini", because that file isn't what we renamed the original file to Right-click "php.ini" and click "properties" Click the "open" button (this will open a window to edit the file in "Notepad") On the "compiled extensions" line, add the extension name to the end of the file that says "xdebug.dll" (don't add the quotation marks to the 6d1f23a050
